

Medicines Safety Improvement Programme

Our Vision

We want people with a learning disability in Coventry and Warwickshire to be happy and healthy.

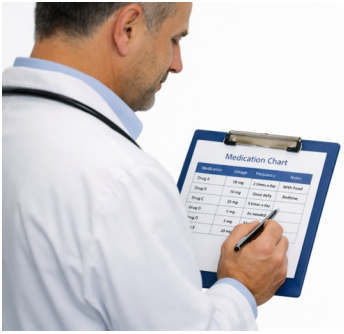

We want to make sure people with a learning disability get their medicine safely and in a way that is best for them.

We want people to get the right treatment, at the right time and only as much as they need.

We want to keep people safe and reduce side effects.

We want to check people's medicine regularly, to make sure it is still helping.

We will change the medicine or stop, if it is no longer needed.

We try to look at all parts of your life, with you, your family and carers. We might ask other health professionals to help you.

This will help us make decisions together and give our patients the right care at the right times.
